### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Cancel claims 11-20.

The cancellation of the instant claims does not require applicants' permission because applicants have withdrawn those claims without traverse in the response filed on Jan. 21, 2003.

2. The following is an examiner's statement of reasons for allowance:

The instant claims are directed to a process for the preparation of a baleable carboxylate terminated conjugated diene polymer, wherein the carboxylate terminated polymer has a bulk viscosity (Mooney viscosity) of greater than 45 and a solution viscosity of less than 75 cP.

Hudson (US 3,791,888) teaches a process for the preparation of a polymer of a conjugated dienes by anionically polymerizing conjugated dienes such as butadiene and optional vinyl-substituted aromatic compounds such as styrene in the presence of organolithium initiator and terminating the polymerization with excess amount of carbon dioxide to provide a carboxylate terminated polymer. Although Hudson teaches that semisolid and solid terminally reactive polymer can be prepared having molecular weight up to 150,000 or higher, Hudson does not teach or reasonably suggest the

carboxylate terminated butadiene polymer to have a bulk viscosity (Mooney viscosity) of greater than 45 and a solution viscosity of less than 75 cP. As indicated in applicants Remarks filed on June 3, 2004, bulk viscosity and solution viscosity of a polymer are determined by the composition and chain structure of the polymer. Since Hudson's carboxylate terminated butadiene polymers has different application compared to those carboxylate terminated butadiene polymers of the instant application, Hudson carboxylate terminated butadiene polymers are unlikely to have the same structures to inherently have the same viscosity properties as the polymers of the instant claims. Therefore, the instant claims are deemed to be novel.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
